

Boat Health & Maintenance Report

Sample Vessel — 54 ft Motor Yacht (Sample) | Reporting Month: June 2026

SAMPLE / ILLUSTRATIVE REPORT — shows the kind of monthly report an Owner-tier Boat Mate subscription generates from equipment and maintenance-log data. Figures below are fictional example data for one boat, not a real vessel.

Snapshot

91% Overall Health Score	2 Active Alerts	12 days Next Recommended Service	14 Systems Monitored
--	---------------------------------------	--	--

System Health

System	Health	Trend	Predicted Action Window	Status
Port engine — raw water pump	71%	↓ Declining	Service within 15 days	Watch
Generator	95%	→ Stable	Next service in 120 days	Normal
Hydraulic steering system	58%	↓ Declining	Inspect within 7 days	Action Needed
Watermaker membrane	88%	→ Stable	Replace in ~60 days	Normal
House batteries	90%	↑ Improving	Next check in 150 days	Normal

Alerts & Recommended Actions

- Hydraulic steering system trending down for 3 consecutive weeks — recommend inspection before next passage.
- Port engine raw water pump showing early wear signs — plan a service window within 2 weeks.

Maintenance Completed This Month

- Generator 250-hour service completed, oil and filters replaced.
- House battery bank load-tested, all cells within spec.
- Watermaker pre-filters replaced on schedule.

Upcoming Recommended Maintenance (Next 90 Days)

- Hydraulic steering system inspection and fluid check — priority.
- Port engine raw water pump service.
- Watermaker membrane replacement, planned around next haul-out.

Generated automatically every month from your boat's equipment and maintenance-log data — no manual compilation required. For captains and owners managing a single vessel.
